

Red Hat AI/ML or Azure AI/ML

Where can you deploy AI: Red Hat vs Azure

	Baremetal on-prem	SaaS	AWS	Azure	OpenShift Dedicated/GCP	Edge	ARM	IBM Power, Z
RHOAI	✓	IBM Cloud with Watson X ✓	✓ ROSA	✓ ARO	✓	✓	H2 2025	✗
Azure	✗	✓	✗	✓	✗	✓	✗	✗

Azure AI offerings and Red Hat

Azure AI offering	Red Hat approximate
Azure OpenAI Service - Bring reasoning and multimodal versatility to your generative AI experiences with secure, scalable access to the latest OpenAI models, including the o1 and GPT-4 series.	Red Hat OpenShift AI & RHEL AI
Azure AI Foundry - Develop and deploy generative AI apps and APIs responsibly with a comprehensive platform.	Red Hat OpenShift AI & RHEL AI
Azure AI Search - Effortlessly find the information you need when you need it with a state-of-the-art retrieval system that uncovers hidden patterns with unparalleled precision.	None
Azure AI Content Safety - Maintain a secure and positive digital presence with sophisticated safeguards that help mitigate harmful content, protect users, and enhance trust—automatically.	TrustyAI built into Red Hat AI
Phi open models - Get powerful small language models (SLMs) with groundbreaking performance at low cost and low latency.	Granite Models from IBM
Azure AI Model Catalog - Access 1700+ foundation models from creators such as Microsoft, OpenAI, Hugging Face, Meta, and Cohere—then experiment, fine-tune, and deploy.	Customers can bring their own models and run on Red Hat AI
